Shaping Prestige

HOOF RASPS

RA912

Famous and well-known advantages of the RA912 :

- **high performance rasp side**
- **long lasting effect, almost up to three times**
- **does not clog**
- **quality consistency, for each box and each batch.**

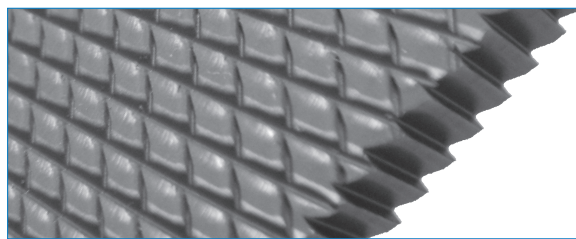

The finish side benefits from :

- **a deeper double cut**
- **an optimised tooth geometry**
- **the V-sharp technology.**

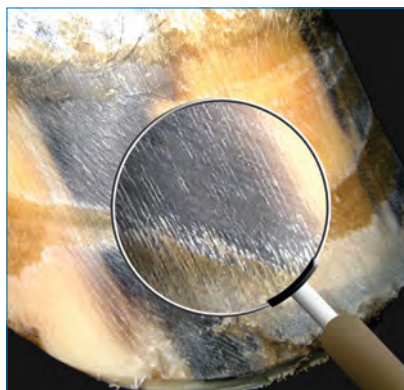

The combination of these parameters have definitely improved :

- **the aggressiveness** : the file removes more material
- **the surface finish** on the hoof : fine, clean, smooth aspect.

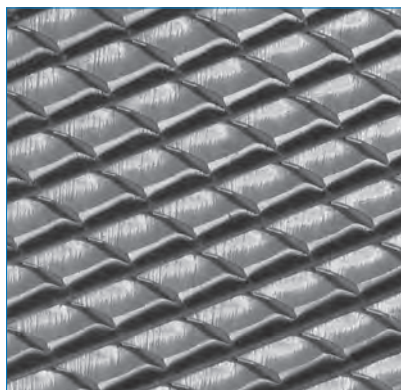

Sharp edges

Performance finish side

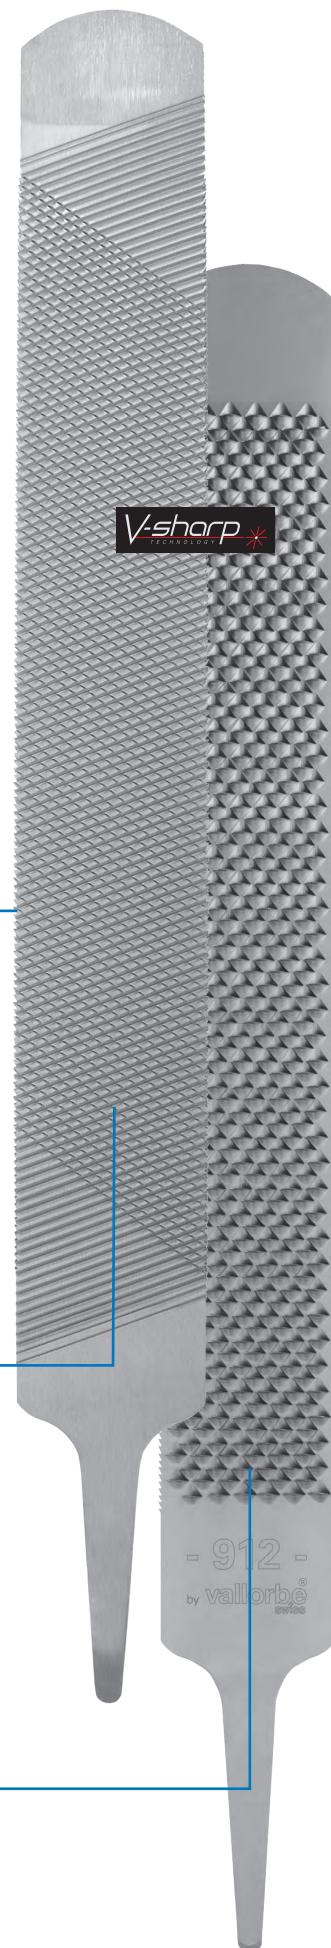

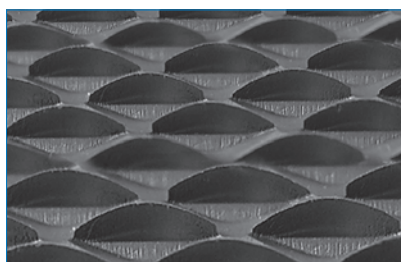

Perfect surface finish (doesn't leave marks)

Highly sharpened teeth

With a standard width of 45 mm, this rasp features more than 500 teeth sharpened by the **V-sharp** technology. Each rasp stroke becomes more efficient and makes the farrier's work much easier.

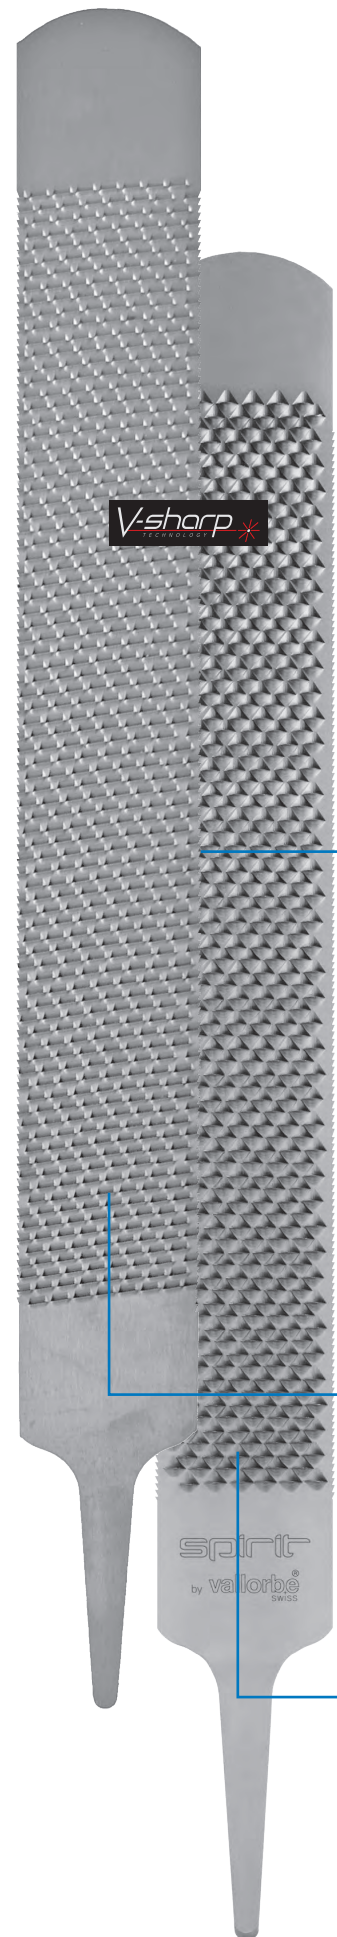

HOOF RASPS

spirit

It is experience and know-how in manufacturing files and rasps for more than a century that motivates **vallorbe swiss**® to keep creating innovative tools. It is in that spirit that the Swiss manufacturer introduces the **spirit**, a new type of farrier rasp with a revolutionary finish side that offers three distinct benefits:

- Will remove up to twice as much hoof as a «traditional» rasp
- The finish surface will be perfectly clean and smooth
- Minimum cutting energy is needed in comparison to a «traditional» rasp.

The **spirit** rasp is the first example of the **vallorbe swiss**® technological inspiration and demonstrates the company's commitment to expanding its range. The goal is to make farriers' lives easier and their performance yet more effective.

HOOF RASPS

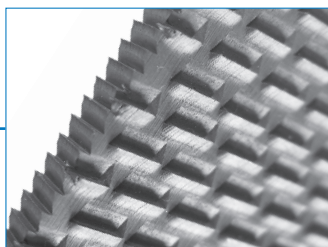

spirit XL

The **spirit XL** has been developed to complete our **vallorbe swiss**® range for farriery, especially in facilitating the trimming on big hooves.

With its larger width (58 mm), the new **spirit XL** offers major advantages to the farriers work:

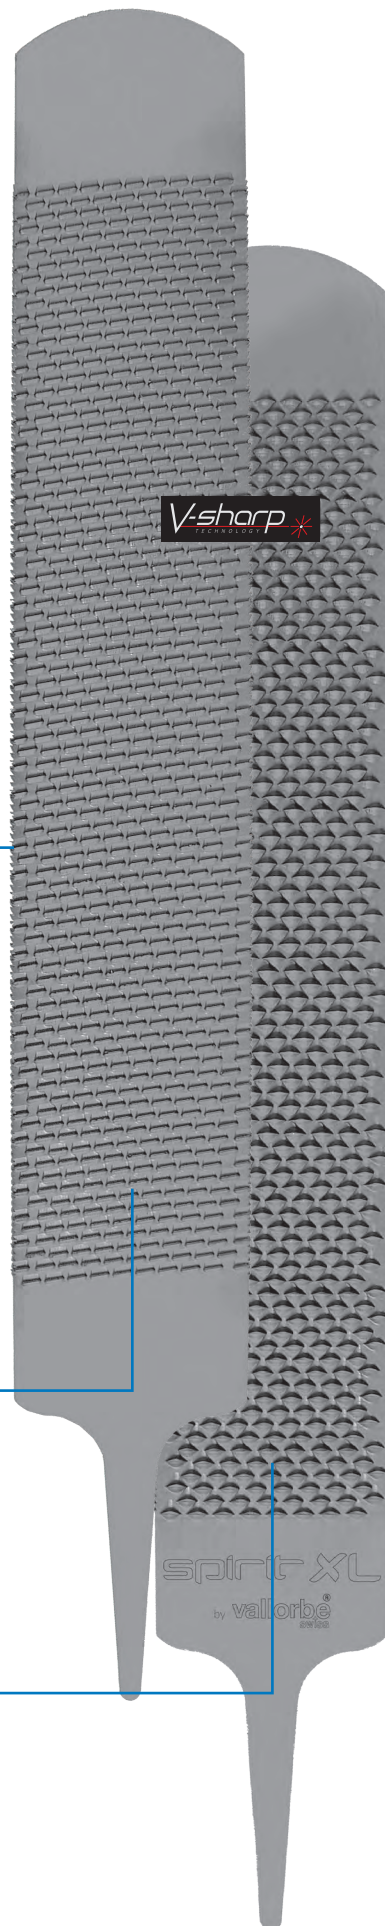

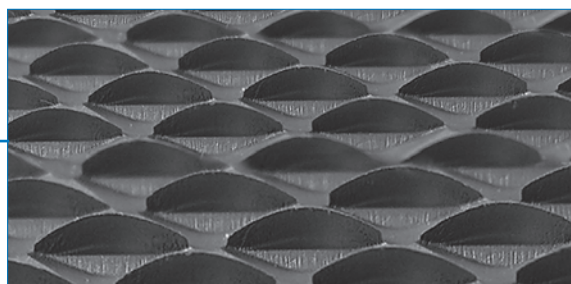

- **Easiness and rapidity** in getting an even bearing surface of the hoof;
- **Increased efficiency** on each file stroke, the volume of removed horn being much more important than the one obtained with any «standard» (45 mm) rasp.

Sharp edges

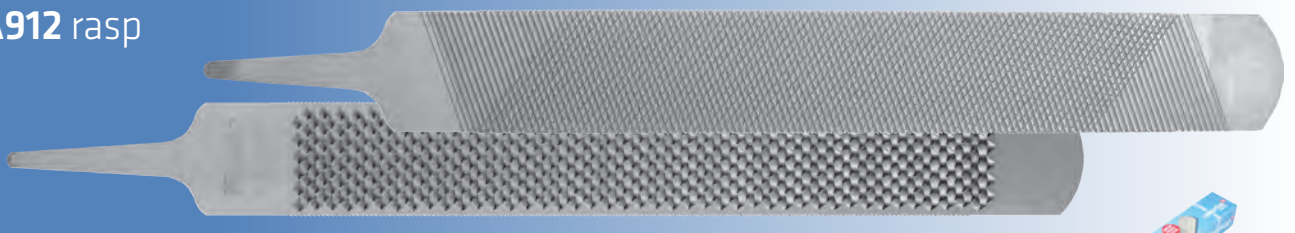

Highly sharpened teeth

The finish side, or file side, of the both **spirit** and **spirit XL** rasps is sharpened with the **V-Sharp** technology. Each file stroke requires less energy and thereby makes the farriers work much easier.

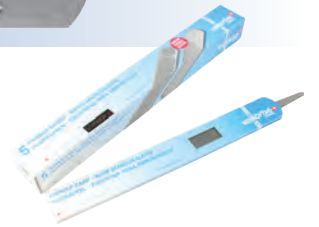

HOOF RASPS

RA912 rasp

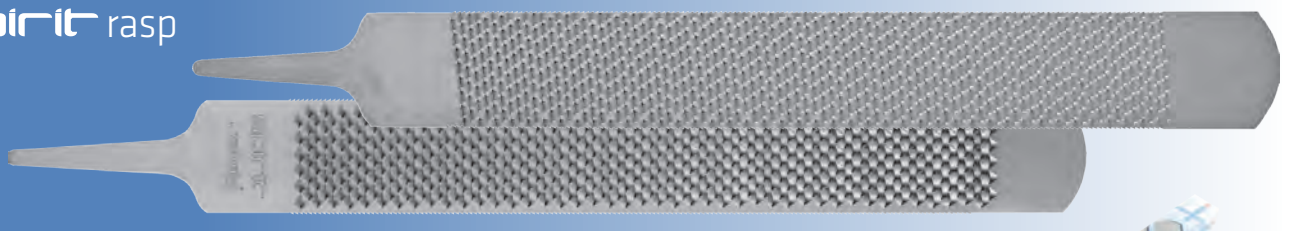

Ref.	Length	Width	
RA912-14	14" / 350 mm	45 mm	5

In a sturdy 5-piece box. Each rasp is packed in an individual sleeve

spirit rasp

HANDLES

Screw-on «Crocodile» handle

Ref.	For	Length	
AL410-BLEU	LC2260-6	105 mm	12
AL510-BLEU	LC2251-8	105 mm	12
AL710-BLEU	RA912-14, RA920-14 and RA960-14	131 mm	12

Wooden handles with black or brass ferrule

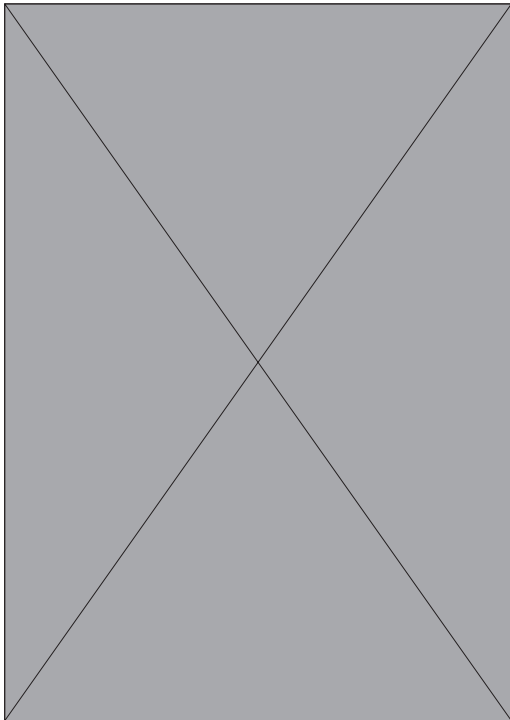

Small handle ref.	Long handle ref.	For	Ferrule	Length	
AL360-VN		RA912-14, RA920-14 and RA960-14	Black	75 mm	12
AL360-VL		RA912-14, RA920-14 and RA960-14	Brass	75 mm	12
	AL350-VN	RA912-14, RA920-14 and RA960-14	Black	110 mm	12
	AL350-VN	RA912-14, RA920-14 and RA960-14	Brass	110 mm	12

We suggest the use of differentiated handles for first or second life rasps.

THE QUALITY LABEL

Manufactured of high carbon steel, farriers have reported that the **vallorbe swiss**® rasps last up to **three times as long** as their competitors.

Throughout the manufacturing process, the rasps are subjected to a number of checks: teeth geometry, cutting height, bite, hardness etc. The **vallorbe swiss**® Quality Control system ensures that the quality of all our products remains consistent.

The **V-Sharp** technology allows in the manufacturing process to put an excellent finishing touch on the rasps. The process **increases aggressiveness** and prevents any slippage no matter how hard the hoof may be.
